

POLLED BEEF SIMMENTAL

OIDIPUS P ZSI 451

Lykke Sirius P x Abundance 217

CZ 500929031 *7. 4. 2006

Relative breeding values – direct effect, Czech, June 2011

65 progenies/7 herds

120 days	210 days	365 days	Index - growth
110	113	114	112

Oidipus P was born in farm of well-known Czech breeder Mr. Kolar. The bull's pedigree is of international origin. Danish father Lykke Sirius P has got currently 67 tested progenies and his offspring has shown exceptional breeding value for growth. The mother of Oidipus is Abundance's daughter and is also genetically polled. This cow belongs to the best cows in Mr. Kolar's herd.

Oidipus P excelled in his own performance test with an average daily gain 2058 g and average gain since birth 1671 g. The Oidipus' weight was 754 kg in the age of 14 months, when he has been approved for breeding and the bull's exterior was awarded by 75 points. His current estimated breeding value for growth is 112, which nominates him to the top of Simmental breed in Czech Republic.

All doses of this bull are used in Germany and other countries too.

PRIMA ET PP ZSI 507

Holm Ulrick P x Vingegard Trinidad P

CZ 573000061 *24. 3. 2007

Relative breeding values – direct effect, Czech, June 2011

19 progenies/4 herds

120 days	210 days	365 days	Index - growth
100	97	104	100

Prima PP was born in Chytka family farm in Mohelno. The bull has come from combination Holm x Trinidad. His mother CZ181048931 PP originates from famous Mr. Kolar's herd. Besides good growth parameters and body conformation, Prima PP is interesting bull for his DNA test confirming his genetically homozygote polled character. The Chytka family has long-term cooperation with LamGen laboratory (holder of research grant for polled character testing) and the family tests each potentially homozygote polled cows by markers test. Homozygote polled bulls are interesting not only in pure breeding, but also in cross breeding. The offspring of homozygote polled bulls is 100% polled, even when they has been used with horned cow.

The Danish, Swiss and German breeders commonly use doses of Prima PP.

ROSENSTOLZ P

Rosenherz PP x Weinold

DE 943827151

1.7.2009

Rosenstolz is a son of Rosenherz. Rosenherz is current father of Beef Simmental bulls in Germany and is also used in Denmark. Mother of Rosenherz comes from dairy system, which guarantee good milk production in Rosenstolz's daughters. Rosenstolz has excellent muscling and he is very harmonious bull.

OTO z Ležnice P ZSI 478

Lesan z Podlesí P x Bovet Iglu P

CZ 509405041

*20. 9. 2006

Relative breeding values – direct effect, Czech, June 2011

32 progenies/4 herds

120 days	210 days	365 days	Index - growth
124	124	145	131

Oto P comes from Mr. Barton's herd. His father Lesan from Podlesi is a son of US insemination bull Omega Gold. Also his mother's father Bovet Iglu has fully US origin.

With record weight 778 kg and height in cross 146 cm measured in age 365 days, Oto P outshines a frame breeds such as Charolais and Blonde d'Aquitaine. The daily gain of this bull since birth was more than 2 kg. The bull is also very firm in constitution and has correct and functional legs.

During a selection for breeding, the bull has been awarded by maximum 10 points in both, body size and weight. Body length and type has been awarded by 9 points and muscling by 8 points. He got total 85 points!

We expect an outstanding growth and muscling of his progenies.

Natural exports his insemination doses to Denmark, Germany and Italy.
