## VIGNY P ZLI 535

Paycheck P x Jordy

FR 8604154069 \*24.9.2004

Vigny P was born as a genetically polled bull in the well known French breed Domaine des Forges, a pioneer in Limousine polled breeding. Although his father is a Canadian bull Paycheck, the French Limousine herd book accepted Vigny and registered him in French Limousine Herd Book. He was successfully classified by a Czech assessor, having received three times 8 points (10 is maximum) for beef conformation of shoulders, back and rump. He received great 81 points in the total exterior scoring! Vigny was tested in insemination in Germany, actually he win following his progeny RZF index 104 and BV for growth 113. His progeny are expected to have good beef conformation and frame. In Czech herds, his first calves were weighted and classified. Except of easy calving they approve up of average conformation and high daily gain. These results are a big success for polled bull!

### Breeding values Germany (12/2010):

Reliability	64 %
RZF (total selection index)	104
Weight in 365 days	113
Muscling	105

## BOLIDE P ZLI 551

Ryde Uranos P x Nenuphar

FR 8700840992 \*23. 9. 2006

Genetically polled Bolide represents a progressive trend of the Limousine breeding. His Danish father, polled Ryde Uranos P, has got perfect beef conformation. Uranos doses are used for pure breeding insemination in France and other countries including Czech Republic. Maternal father is a well known French improver Nenuphar, also widely used for pure breeding. Bolide was purchased in France.

In the age of three years he shows very good growth and development. We rate his beef conformation of back and rump the most. We recommend Bolide both for pure breeding and crossing as well.

# POLLED

The bull is intensively used for his genetically polled character in the world. He excels due to large frame and extreme body length and firm back. His actual insemination weight is 1400 kg, and he jumps at A.I. center for times a week! Zako is a very fit bull and a reliable semen donor. More than 80.000 doses have been sold. Progeny are calved easily and are lively with a high frame and growth capacity.

**NIKOLKA**      **ZLI 473**

**Kolja x Jokey**

### RELATIVE BREEDING VALUES, CZECH REPUBLIC ESTIMATIMATION

9/2011	growth 120 days	growth 210 days	growth 365 days	index growth
<b>Direct effect</b>	108	119	112	<b>113</b>
<b>Maternal effect</b>	101	109	112	<b>107</b>

- \* **GROWTH ABILITY**
- \* **MUSCLING**
- \* **EASY CALVING**
- \* **CONFORMATION 82 POINTS**

The pedigree of the bull displays the best premises for growth. His father Kolja and maternal father Jokey have the growth breeding value higher more than 120! Also Nikolka has very high breeding value for growth. Nikolka displays average frame with good beef conformation which may be very useful in crossbreeding.
