### CALVING

Ravi is a hot new member of our offer, he was bought in the first round of auctions in the French performance testing station in Charmoy, where he achieved great results. He comes from the distinguished Earl Houdmon breeding which has produced several bulls for the Genes Diffusion offering. Ravi's sire is the well known Losc, his dam's sire is Giono. Like his sire and dam's sire, Ravi is a limb improver. Ravi has excellent genomic results for calving ease (111), growth (109) and also frame (111). ISEVR 124 combined with IVMAT 121 make him an absolutely exceptional bull that will be very easy to use in your herd. Even though Ravi is an exceptional muscling bull, he does not carry the gene for double muscling. Ravi is a very harmonious bull with a well shaped pelvis that will be an ideal choice for heifers and cows where you want to improve muscling and body capacity while maintaining frame. Ravi does not carry the gene for progressive ataxia.

EXTERIOR EVALUATION										
Frame			Body capacity			Muscularity			Breeding type	Total
VT	DT	HM	PŠ	HH	DZ	PL	HŘ	ZÁ		
8	8	10	8	9	8	8	8	8	9	84

acronyms: VT - height, DT - length, HM - weight, PŠ - chest width, HH - chest depth, DZ - pelvis length, PL - shoulder, HŘ - top line, ZÁ - Thigs

**IMPORTED FROM FRANCE**  
**84 POINTS FOR EXTERIOR**
