CONFORMATION

Chips PP weighed 648 kg in the year and was rated 89 points for exterior.

The annual weight of 639 kg and the gain in the daily gain in test of 2,233 g testify to his excellent growth. 3x 9 points for muscling is certainly unprecedented for a homozygous hornless bull. Chips is suitable to use in your cows as a muscling corrector. We only recommend Chips for insemination of cows until he is proven.
